Create PDF using InDesign

Please vectorize fonts (especially free fonts and extraordinary fonts) before you export your PDF files (Adobe InDesign > Menu „Type“ / *Create outlines*). So we can guarantee better that texts are displayed in a correct way.

Your PDF file should be exported directly from Adobe InDesign.

Please use our PDF settings for InDesign.

You can find the file „**ASS_PDFX_2016.joboptions**“ at our homepage www.assaltenburger.de >> **Gestaltungsrichtlinien** or contact your client advisor.

Using Mac OS X: Open in Finder with „Go to ...“ and pressed „Alt-Key“ the directory Library/Application Support/Adobe/Adobe PDF/Settings/ and copy the file „**ASS_PDFX_2016.joboptions**“ into it.

Using Windows 7 and higher: Install the file by double-clicking or copy the file in the directory

Computer/HDD/User/Public/Public documents/Adobe PDF/Settings

Go to **File > Adobe PDF-Settings > Define ...**

After clicking „**Load ...**“, choose the directory from above, choose „**ASS_PDFX_2016.joboptions**“ and click „**Okay**“.

Choose **Datei > Exportieren...** Choose „**Adobe PDF**“ in „**Formate**“.
Choose a directory and press „**Safe**“.

Choose the PDF preset „**ASS_PDFX_2016.joboptions**“ and do your adjustments like in the following screenshots

PDF check in Adobe Acrobat Pro CC

After creating your PDF please check it for mistakes. Only with the right adjustments in Acrobat you can check your files with correct results of overprint and transparency adjustments. You can check your files with Adobe Acrobat Pro or Adobe Reader.

If you use Acrobat Pro to check your files, be sure that in the presets „Use local fonts“ is deactivated.

Using the tool „**Prepress Production**“ (Druckproduktion) you can open the „**Output Preview**“ (Ausgabevorschau) in the right menu of the Acrobat main window. Be sure that you've activated „**Simulating Overprint**“. The **total ink coverage** (Gesamtfarbaufrag) should not be more than 300% (type in 301% in the input field).

PDF check in Adobe Reader (older versions)

Activate the „Overprint Preview“: Adobe Reader > Preferences > General > Page preview (PC: Adobe Reader > Edit > Preferences > General > Page preview). That's possible since Acrobat 7.

PDF check in Adobe Reader (newer versions)

Activate „Overprint Preview“ (Überdruckenvorschau): Adobe Reader > Preferences > General > Page Display (PC: Adobe Reader > Edit > Preferences > Page Display).

The newest version of Adobe Acrobat Reader can be downloaded for free at <https://get.adobe.com/de/reader/>

Data transfer

Please send us PDF files.

The order of the pages in the PDF file need to be the same as the order of your cards in the deck.

Important: We need 1.4 PDF files or higher. Please **don't send us 1.3 PDF files** (respectively flattened files without transperencies). These files cause problems in our workflow!

Native files

In addition to PDF files you can also send us native files. So it's possible to do corrections for you (chargeable). Pay attention for complete data (all images, fonts etc.).

File names

- Please use short and concise names for your files. (e.g. label front and back side with „_front“ and „_back“)
- Avoid special symbols like ß, /, \, *, !, <, >, ô, ë, [,] for file and directory names.
- Always use an underscore „_“ instead of space for separation.

Data transfer

Data storage devices or digital data transfer

- E-Mail (up to max. 10 MB)
- FTP (please ask us for correct use)
- If you send us files via FTP or email, create a .zip file before transfer
- CD / DVD

If the delivered material does not correspond to the mentioned specifications, additional prepress costs must be calculated. If you are not sure that your layout files have been created properly, send us your test files in order to be checked. If necessary, we will gladly give you advise and contact you.
